

## How to Install AlgoNexus EA

**What you need:** MetaTrader 5 and your AlgoNexus EA file

### Step 1: Open MetaTrader 5

Open the MetaTrader 5 application on your computer.

### Step 2: Download the AlgoNexus EA

Download the AlgoNexus EA file you received (check your email or download link).

### Step 3: Open the Data Folder

- Click **File** → **Open Data Folder**
- A folder window will open

### Step 4: Navigate to the Experts Folder

- Open **MQL5** folder
- Open **Experts** folder

### Step 5: Copy the EA File

Copy the AlgoNexus EA file into the Experts folder.

### Step 6: Refresh Navigator

Press **Ctrl+N** to refresh MetaTrader 5.

### Step 7: Enable Settings

#### **Enable Auto-Trading:**

- Click the **Auto Trading** button at the top toolbar (turns green when active)

#### **Add WebRequest URLs:**

- Go to **Tools** → **Options** → **Expert Advisors**
- Check "**Allow WebRequest for listed URLs**"
- Add these two URLs:

- <https://us-central1-robertv5.cloudfunctions.net>
- <https://robertv5-default-rtdb.firebaseio.com>

## Step 8: Attach EA to Chart

- In the **Navigator** panel (left side), expand **Expert Advisors**
- Drag **AlgoNexus EA** onto your chart
- Enter your **License Key** when prompted
- Click **OK**

## Step 9: Verify Connection

Check for:

- Smiley face icon in top-right corner
- Green checkmarks indicating successful connection

## Troubleshooting

### **EA not showing in Navigator?**

Verify the file is in the Experts folder and refresh (Ctrl+N).

### **Sad face icon?**

Enable Auto Trading from the toolbar.

### **WebRequest error?**

Add both URLs in Tools → Options → Expert Advisors.

### **License Key invalid?**

Check for typos or extra spaces.
